

# Cobá midi

Reliable GaN powered  
multi-way distribution hub.  
Available with 6 or 10  
outputs

- Features GaN components paired with advanced thermal management to keep everything cool, enabling faster charging while using less energy.
- Quick Charge technology allows for fast charging of smartphones, including iPhones, by dynamically adjusting voltage levels to optimize charging speed
- Certified Qualcomm chip to ensure compatibility and future proof design.
- Available in black or white

## Why are GaN chargers better than ordinary chargers?

GaN components work more efficiently than silicon. This allows GaN devices to have superior power and speed and operate at lower temperatures. Heat is the component killer, less heat equals better reliability. Less heat also means less electricity use which is also better for the environment!
